MEMORANDUM

TO: Land Division File:

EPA Region 5 Records Ctr.

367697

FROM: G.E. Steele

JUN 19 1980

DATE: 06-05-80

SUBJECT: Macon Co. L.P.C. # 11580408 Decatur / Macon Co. # 2

E.P.A. - D.L.P.C.

STATE OF ILLINOIS

 Information only Response requested

I spoke with Mrs. Cindy Jackson and Mr. Ed Duncan during my inspection of this permitted operating site. A check of the manifests was made with Mrs. Jackson. It was found that Borg-Warner was not putting their generator number on the manifests. They were called while I was still in the office and informed of this deficiency.

The active area is located at the southern end of the excavation on the upper lift. Some of that days refuse had already received daily cover. The south side of this area had not received adequate cover on some previous day. An approximate 5 yard x 15 yard area was observed with refuse protruding through cover material.

Due to the recent heavy rains, cover had eroded away from the central slopes of the previously filled section of the site. Refuse was observed through cover at widely scattered points over this past face.

Papers were observed blowing over the site, but all were being contained within site boundaries.

The sites perimeter had been opened west of the 36" drainage culvert to allow surface water trapped in this area away from refuse to leave the site. A drainage ditch was dug to conduct this water to the existing drainage way. I informed them of this permit violation, and suggested that since this appears to be a re-occurring problem they might want to modify their permit to allow for this.
